Debs' designs capture zeitgeist

Think you'd always recognize the Middle Eastern aesthetic for classics such as the backgammon board and mother-of-pearl inlaid mirror? They have been brilliantly reinterpreted by Lebanon's iconic designer Nada Debs, who has a knack for creating cult classics.

Her work has become famous internationally because it epitomizes the essence of the modern Middle East. Debs' customized art installations have been featured in museums from Europe to the Far East.

Luckily her creations also grace our own galleries, stores and restaurants. See how her traditional furniture and objects breathe fresh air and stand in contemporary elegance at her boutique in Zaitunay Bay and showrooms in Saifi Village.
